

Grass Clippings and Leaves

Residents are reminded that Chapter 216 of the City Code prohibits the placement of grass clippings, leaves, or similar material in streets, alleys, or sidewalks. Residents should leave clippings in their yard or should bag these materials and set them out as yard waste on the appropriate collection day, or should convert them into compost. Keeping these materials out of the streets and off the sidewalks improves safety for motorists and pedestrians, and helps to prevent the clogging of storm drainage catch basins and pipes.
